OBJECTIVE

Java/Spring Boot developer who has built and implemented a complete full-stack application, understands REST APIs, databases, authentication and frontend integration, and has demonstrated DSA problem-solving.

EDUCATION

B.Tech Information Technology, Panimalar Engineering College 2026
CGPA: 8.7/10

HSC, Brindavan Higher Secondary School 2022
Percentage: 87%

SSLC, Brindhavan Higher Secondary School 2020
Percentage: 95%

SKILLS

Programming Languages	Java, SQL, JavaScript, HTML, CSS
Frameworks / Libraries	React, Spring Core, Spring MVC
Databases	MySQL
Tools / Platforms	Git, IntelliJ, Postman
Problem Solving	Data Structures and Algorithms

PROJECTS

RAG-Based Document Completeness Verification Using Negative Space Analysis

- Developed a RAG-based document verification system using Python, LangChain, Sentence-Transformers, and FAISS/ChromaDB to automatically detect missing mandatory clauses in policy documents.
- Built an interactive Streamlit web application integrated with an LLM to generate evidence-backed completeness reports.

Digital Steganography– Secure Image-based Message Encoder(Java Swing, LSB Algorithm)

- Engineered an efficient steganography tool with LSB algorithm and encryption key for secure communication.
- Optimized encoding and decoding performance, ensuring fast processing and reliable message security.

E-Commerce Platform — React, Spring Boot, Spring Data JPA, MySQL

- Engineered a scalable e-commerce application with features like product search & filtering, wishlist, cart, and order tracking.
- Implemented backend microservice architecture with Spring Boot, JPA and MySQL for CRUD operations, achieving 99.9%.

ACHIEVEMENTS AND CERTIFICATIONS

- Solved 100+ coding problems on Leetcode.
- Java Programming – NPTEL
- Java Developer certification – Infosys Springboard
- HTML, CSS, JavaScript– Coursera
- Data Visualization – Forage
- Participated in coding challenges and hackathons, demonstrating problem-solving under pressure
